Chemical Free, Crystal Clear, Water Recycling Solutions

Water Treatment Solutions custom designs, installs and services water filtration and recycling systems developed specifically for the water recycling needs of the Stone Industry.

The Team at Water Treatment Solutions pioneered and patented chemical free water recycling, over 25 years ago, and brings together years of industry experience with water filtration and recycling expertise to provide you with the best the industry has to offer. Unique to us, our system operates without the use of chemicals, saving you money on consumables and providing a safe system for your employees, equipment and the environment. We also support our systems with the best Customer Service in the industry.

Our systems produce crystal clear water filtered to less than 2 micron and gray water filtered to 25 microns. Our chemical free, crystal clear water is safe for all clear water demands. All our systems provide your shop with the water volume and pressure your equipment requires and they provide for future growth. Various automation packages are available to simplify daily operation and to shorten the cleaning cycle – all geared to save your team time and that saves you money! Upgrades are available for existing Systems.

TELL US ABOUT YOUR OPERATION

WHAT WE NEED TO KNOW TO HELP DESIGN THE PERFECT SYSTEM FOR YOU

Describe your product: counter tops, architectural stone (explain), other.

Recycling goals: eliminate discharge, save money, supply enough water & pressure, etc.

Fabrication level per day: # of kitchens, # of slabs, square footage, or alternate unit of measure.

Do you anticipate this volume will increase over the next few years, and if so at what rate?

Supply a listing of all fabrication equipment (including hand tools) in use and planned in the future.

How do you manage your wastewater presently? Do you have trenches and a pit? What size is the pit?

What space do you have available for a recycling system?

APPLICATIONS FOR STONE

- CNC Routers
- CNC Saws
- Edge Polishers
- Edge Profilers
- Surface & Radial Arm Polishers
- Saw/Water Jets
- Hand Polishers
- Hand Routers
- Bridge & Gantry Saws
- Block & Profiling Saws
- Wire Saws
- Calibrating & Polishing Lines
- System flow rates to 500+ gallons per min.

PROUDLY MADE IN THE USA

Water Treatment Solutions' variety of products are designed for the Stone Industry and their unique needs. We offer solutions for ALL size operations.

CALL FOR A LIST OF SATISFIED CUSTOMERS

BENEFITS FOR STONE

- 30 Minute Cleaning Cycles
- Crystal Clear Water filtered to less than 2 micron
- Gray Water filtered to less than 50 micron
- Recycles 100% of your process water
- Improves product quality
- Increases productivity and saves money
- Designed to expand with your business
- Turn stone slurry into dry filter cakes
- Automated control options
